

Santa's Sweatshop: PrintAndPlay

Instructions

Print out all the files. For anything that is a game component, we recommend printing on card stock if possible.

For the cards, if you are going to sleeve them (recommended), print out the “backless” version and print single-sided. Otherwise print out the not-backless version, double-sided.

We recommend sleeving as it is much easier to shuffle and handle the cards.

Cut out player mats and tracker.

If you could not print on card stock, consider mounting all the non-card components on cardboard (tedious but worth it, paper is just difficult to deal with and gets unsettled too easily).

You will also need:

- Player tokens: one per player in yellow, red, green, blue, and purple.
